

Kelly's Training Doggie Daycare

818-985-4800

A unique approach to Doggie Daycare that provides your dog with the most entertaining, mentally challenging and safe daycare environment.

There are three key factors that set Kelly's Doggie Daycare apart from the rest:

- basic manners training during stay
- rotating activity schedule
- small play-groups

We want your dog to have the time of their life here at Kelly's, but we also want them to be safe and since our passion is training, we also want them to learn positive behaviors that will make them better canine citizens! We use only gentle motivational training methods (using love, affection, and fairness), so your dog enjoys being mentally challenged. We make learning fun! So, basic manners training is included in your dog's daycare stay. No additional charge!

We also have numerous fun activity areas that the dogs are rotated through throughout the day. This keeps them entertained and prevents anyone from getting over stimulated in one area. Nap times are scheduled into the day as well.

But, the MOST IMPORTANT THING THAT SETS US APART is our small play-groups! We evaluate each dog and place them into a small play-group of other compatible dogs. Keeping the groups small is the key to safety and overall enjoyment for all the dogs, but this unique doggie daycare design allows us to specifically help many shy or fearful dogs that would not be comfortable at a typical doggie daycare.

Our top priority is the safety and enjoyment of all our daycare clients, so all of these elements are designed with that one main goal in mind. We carefully screen out any dogs that are dog-dog aggressive.

"Whenever my clients would ask me about doggie daycare, I would say 'don't do it!'. I finally realized there was a need for a SAFE alternative to the typical doggie daycare, so I sat down and tried to figure out how I could build a daycare that was safe and where the dogs would not become too 'doggy' (meaning that they would become more focused on dogs than people- a common problem in the typical doggie daycare set-up) What I came up with is the 3 key factors that are the basis for Kelly's Training and Doggie Daycare! Basic manners, rotating activity schedule, and small play-groups. Now I can finally say "Yes, DO IT, Sign your pup up today, they will thank you for it!"
